

GreenSightSM Waste Stream Management

Measurable Improvements in Productivity, Compliance and Cost-Efficiency

GreenSightSM service is a comprehensive, integrated program for managing waste streams.

Through optimized planning, scheduling, process control, tracking and reporting, GreenSight service delivers quantifiable improvements in cost-efficiency, productivity and environmental compliance.

Comprehensive

GreenSight service begins with a thorough analysis of each waste stream – from the point of generation to ultimate disposition. Next, Evergreen develops detailed plans and procedures to eliminate inefficiencies, reduce costs, improve productivity and ensure environmental compliance. Evergreen then performs and tracks waste management activities using highly trained technicians, experienced project managers and the latest equipment.

With GreenSight service, there are no more missed samples, lost boxes, half-empty truck loads, costly delays or unnecessary movements. The utilization of personnel, transportation equipment, storage containers and other assets is optimized to achieve maximum productivity at minimum cost.

Hazardous waste is minimized. Environmental regulations are scrupulously followed. Safety is enhanced.

Informed

GreenSight service includes a complete package of communication tools for tracking, metrics and reporting. These resources give you accurate, up-to-date information about container locations and contents, waste volumes, compliance requirements, schedules and more. In addition to assisting with daily management tasks, this information helps assure accountability of personnel and suppliers while providing a wealth of data for continuous process improvement.

Flexible

GreenSight service offers the versatility to adapt to your needs. It can be applied to a single project, deployed unit-wide, or performed for an entire plant. It also is offered as a stand-alone service or can be incorporated into an existing contract.

Benefits

- Reduced operating costs
- Increased productivity
- Improved asset utilization
- Coordinated scheduling
- Enhanced environmental compliance

GreenSightSM Waste Stream Management

Measurable Improvements in Productivity, Compliance and Cost-Efficiency

A Trusted Resource

GreenSight service represents the culmination of decades of experience and leadership in industrial services. As a full-service provider, Evergreen has an in-depth understanding of plant processes and waste streams, with the insight to properly analyze waste materials and determine the most effective way to handle and dispose of them.

Evergreen has an award-winning safety record, including NPRA Contractor Merit Awards, Industrial Safety Training Council Safety Awards, and OSHA Voluntary Protection Programs (VPP) Star status.

How much time, money and productivity can be recovered by optimizing your operations? Contact Evergreen Industrial Services today to discover what GreenSight service can do for you.

Assets

TRANSPORTATION EQUIPMENT

- 3-Axle "Bobtail" Units
- Single hauler roll-offs
- Drop Deck single hauler roll-offs
- Double hauler roll-offs
- Tractors
- End Dumps
- 130 BBL Vacuum Tanks
- Pneumatic Trailers
- Flatbeds

STORAGE & CONTAINMENT

- Open Top Roll Tarp Boxes
- Vacuum Boxes
- De-Watering Boxes
- Roll Lid Boxes
- Portable Hoppers
- Tankers
- Frac Tanks
- Containment

Services

- Chemical Cleaning
- Tank Cleaning
- Turnaround Services
- Hydroblasting
- Waste Processing & Minimization
- Vacuum Services
- UHP Water Cutting
- Transportation Services
