

Tank Cleaning & Waste Minimization

Turnkey service for tough cleaning projects

Evergreen's highly specialized personnel provide efficient and cost-effective tank cleaning using the latest equipment and technology. Each cleaning project is carefully planned to reduce tank downtime and minimize risk and waste.

From our full complement of tank cleaning equipment, we select the tools that will offer the best and safest approach for your particular project. Our automated processes reduce in-tank man hours and employee exposure to hazardous vapors.

- Finished products, petrochemical feedstocks, black oil, asphalt, waste water - any tank from 10' to 340' in diameter
- RVTTC Robotic Vapor Tight Cleaning System
- High-volume 2 phase, decanter centrifuges for oily sludges (200 GPM capabilities)
- Belt press and filter press technology for aqueous sludges
- Floating dredges for pond and basin cleaning
- Solid waste management and transportation with roll-off box service
- Degassing and vapor recovery services
