

Vacuum Services

Liquid or air machines for every application

Whatever your requirements for industrial vacuuming, Evergreen can provide the right equipment and personnel to do your project on time and on budget. With highly trained machine operators and state-of-the-art equipment, we bring the best team to your site

to get the job done efficiently.

Our full complement of vacuuming equipment includes liquid vacuum units, air machines, hydro-excavation jet rodder, and Myers cleaning systems. In-line hydrocarbon scrubbers and pressure relief tools ensure a high level of safety.

Liquid Vacuum Units

- 70-barrel hatchback, 3,000-gallon capacity
- 130-barrel vacuum tanker, 5500-gallon capacity, for liquid and slurry materials
- DOT certified for over-the-road hauling

Air Machine Units

- 16-cubic-yard debris box
- 27-inch Mercury vacuum (maximum)
- 5500-SCFM maximum airflow, for heavy sludge and solids
- Two-stage filtration to eliminate dust
- Cyclone attachments
- Auger attachments
